

## Good weekend in Holland

Tuesday, 08 May 2007

Two Dutch classics were on the program May 5- 6th. De Ronde van Overijssel and Omloop der Kempen are two very old races in Holland with a great history. Both races are aggressive, flat and technical; a lot of windplay.

Our guys did a lot better then last year. Especially Loh has made great improvements.

Thijs and Pol know the routines in aggressive races like this well and finished both races. The rest of the guys did well in Overijssel, staying with the main field until deep in the race. On sunday the race started more aggressive and guys got dropped earlier. The main target was to learn about positioning, aggressive racing and especially the Chinese guys have learned a lot!

Next races: Westphalen GP (May 17), training camp Beijing, Tour of Japan (May 20-27), Tour of Crete (May 17-20)
